

User's Setup Guide, T4000 Series

1

Step 1: Unboxing and initial printer assembly. The top image shows the printer being removed from its shipping box. Below are three diagrams: the first shows the printer with the front cover being opened; the second shows the front cover being rotated to the open position; the third shows the printer with the front cover fully open, ready for media installation.

2

Step 2: Media installation and routing. The top image shows ink cartridges and a roll of media being loaded into the printer. Below are three diagrams: the first shows the media roll being mounted on the printer's rollers; the second shows the media being fed through the printer's internal rollers; the third is a detailed diagram of the media path with a legend: a solid blue line for 'Ink coated outside', a dotted blue line for 'Ink coated inside', and a dotted red line for 'Media routing for peel-off mode'.

3

Step 3: Cable connections and power. The top image shows a network cable and a power button icon. Below are three images: the first shows a network cable being plugged into the printer's network port; the second shows the printer's rear panel with USB, FireWire, and network ports, with red arrows pointing to each; the third shows the power button on the printer's front panel being pressed.

4

Step 4: Printer setup wizard. The top image shows a stylus icon and a printer screen displaying the 'Printer Setup WIZARD' menu with language options: English, Italiano, 简体中文, Deutsch, Español, 繁體中文, Français, Português, 한국어, and Русский. Below the screen is a red arrow pointing down to another screen showing the instruction: 'Positioning the Lower Sensor. Slide the lower sensor horizontally so that the arrow on the sensor lines up with an arrow on the printer.'

5

Step 5: Support resources. The top image is a QR code. Below it is the website www.PrintronixAutoID.com. Further down are icons for a folder, the PrintNet-enterprise logo, a question mark icon, and a video camera icon.
